

## Weatherproofing penetrations for pipe and cable entry in flat roof plant areas

### PP3

- Powder coated aluminium finish for added durability
- Pre-primed base section for quick installation
- Cover flashing deep enough to permit vertical insulation
- Removable access lid to give clear working access
- Upstand height allows for future waterproofing under services, without the need for de-commissioning

### Roof-Nek

- A spun aluminium base
- Large area to bond to the waterproofing
- Detachable lid for ease of access
- Allows sufficient clearance for future re-roofing under existing services
- A pipe/cable port plate with knock-out holes
