

Expansion Joint Tapes

Roofing waterproofing expansion joint system for sealing between construction elements

ProEXP 20/40 & Flamline 100/240

- Ideal solution for new build and refurbishment projects
- Compatible with hot melt systems and torch-on membranes
- High resistance to building vibrations
- Easily follows the line of any joint
- Highly elastic expansion zone
- Individual strips can be put together on site using the specially designed vulcanization device

ProEXP 20

A	Lateral Movement	(max +20mm)
B	Longitudinal Movement	(max +20mm)
C	Vertical Movement	(max +20mm)

ProEXP 40

A	Lateral Movement	(max +40mm)
B	Longitudinal Movement	(max +40mm)
C	Vertical Movement	(max +40mm)

FlamLINE 100

A	Lateral Movement	(max +100mm)
B	Longitudinal Movement	(max +50mm)
C	Vertical Movement	(max +75mm)

FlamLINE 240

A	Lateral Movement	(max +240mm)
B	Longitudinal Movement	(max +120mm)
C	Vertical Movement	(max +180mm)
